Greek roots: answer key

Use after the written tasks. Accept equivalent explanations. Ask learners to explain corrections rather than copy them.

1. Tele-: far or at a distance.
2. -Phone, related to phon-: sound or voice.
3. Graph- or -graph.
4. Micro-: small.
5. Tele- points to distance; -graph to recording or writing. Here a telegraph is a system for sending coded messages across distance. The sentence supplies more than the root clues.
6. It means her own handwritten signature. Graph gives a writing clue, but not all writing is a signature.
7. No. It points to the very small objects or details being viewed. The instrument itself can be large.
8. Tele- gives distance and -phone gives sound. A telephone enables people to communicate across distance. If uncertain, check a dictionary definition and the surrounding sentences.

Check and transfer

Return to the exit task without the key. Then use the eight-question online check. Read the explanation for each answer.
